Executive Summary

Our pathway towards tackling the problem of cancellation and no-show

plum

Goal

The company faces a challenge where 5% of scheduled consultations in a month result in patients failing to show up, while 14% of consultations are explicitly cancelled by patients. How can they **bring down the no-show rate to 1%and the cancellation rate to 5%.**

Question

- What is the **ideal user persona**?
- What are their **pain points** and **expectations**?
- What are the key **reasons** for cancellation and no-show rate?

Solution

Plum Score	Time Tracker	Info. & Filters	Reminder Strategy	Easy Rescheduling
A **score** based on **past** consultation **record** and **restricting features**	Real-time **tracker** and **call duration estimator**	Introducing **filters** along with stating **doctor's experience**	Integrating **Google Calendar** while introducing **new features**	Strategic **placement** of **rescheduling option.**

Impact

4%	9%	11	43%
Reduction in No-Shows	**Reduction in Cancellation**	**Months of Implementation**	**Increase in Responsible Usage**

Users of teleconsultation services prefer regular reminders from the application with minimal wait-time and a certain degree of trust with the doctor.

User Persona

1

Convenient Consumer

Description
Gen Z and Millennials
Age - **18-35**
Value: **Ease of Use**

Pain Point
Wants the app to minimize efforts and personalize use

2

Busy Bee

Description
Working Professionals
Age - **22-50**
Value: **Time over Money**

Pain Point
Wants quick consultation without any unprecedented delay

3

Skeptical Senior

Description
Parents of Employees
Age - **40-60**
Value: **Trust Factor**

Pain Point
Wants a certain degree of trust with the doctor

Reminders

55%

Users **prefer regular reminders** from the app to entice usage

Wait-Time

53%

Physicians have **waiting time more** than the **average frustration level**

Distrust

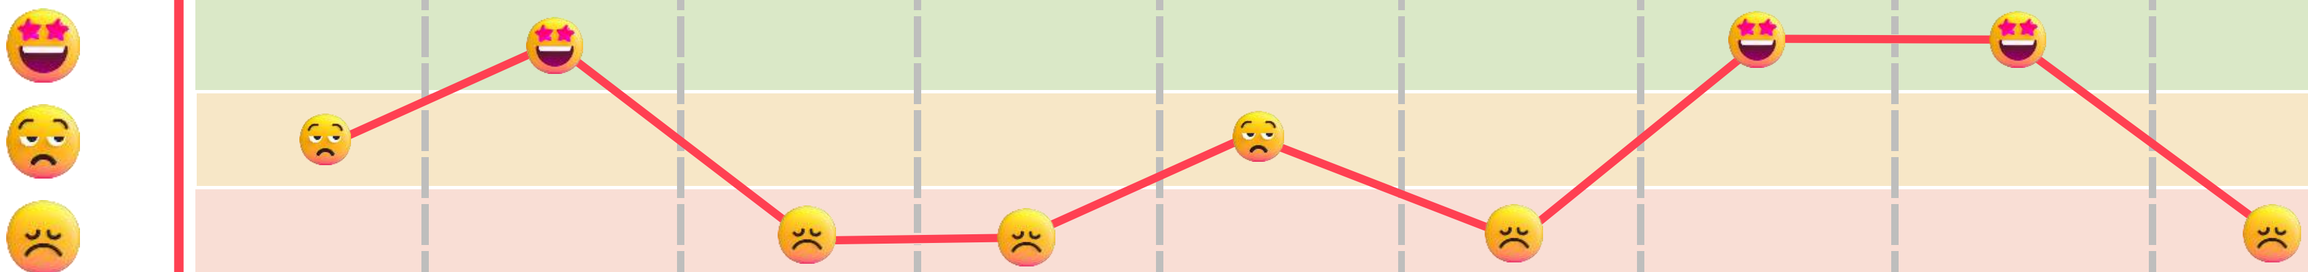
61%

Patients **do not agree** to the **diagnosis** by a doctor through **teleconsultation**

Finding the right doctor, along with reminders, waiting -time and rescheduling are the key pain points in the customer journey

Customer Journey

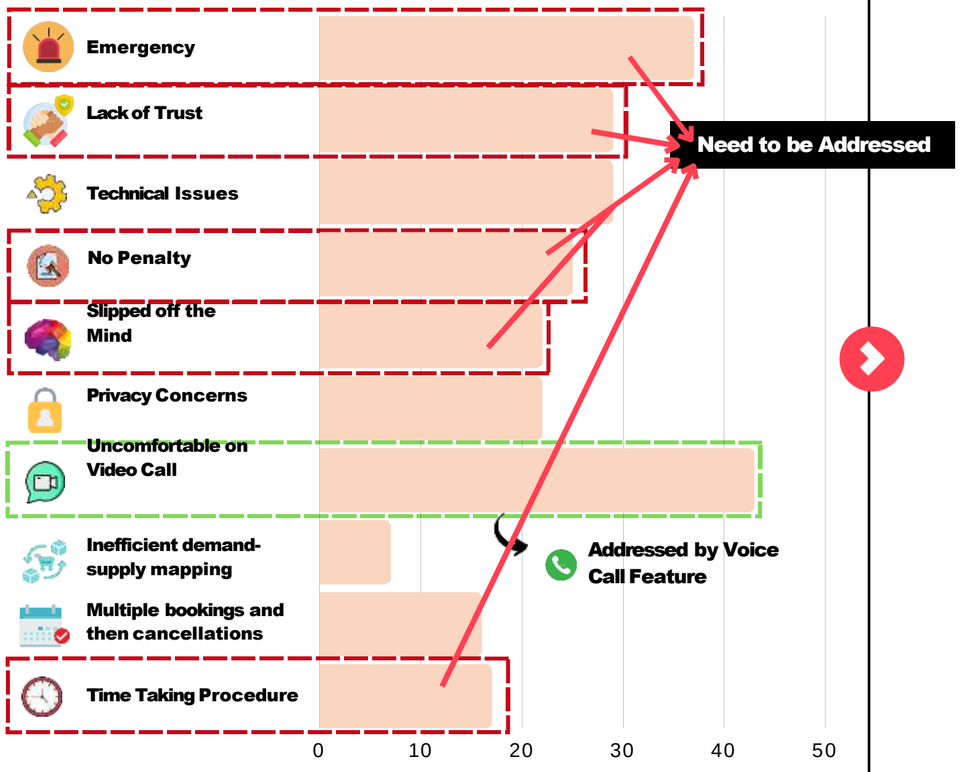
Stages	Joining App	Finding Your Doctor			Reminder	Consultation		Post-Consultation Experience	
Activities	Logging into the App	Choosing Doctor's Specialty	Applying Filters	Selecting the Doctor	Receiving Reminders	Waiting Window	Live Consultation	Follow-Up Calls	Rescheduling Appointment
Experience	Annoyed with the present signup system	Clear demarcation of various specialties	Lack of crucial factors to make the decisoin	Lack of trust due to insufficient information	Missing appointments when they do not check phone	Unusual delay in starting the consulation	Smooth experience with video and voice call	Follow-Up consultations improve satisfaction	Barrier to rescheduling in terms of opening app
Expectation	**Seamless process with Google sign in support**	MECE bifurcation of all specialties	**Additional filters to find the best doctor**	**Including patients served, rating and other details**	**Better way of sending reminders**	**A timely update on any and every delay**	Providing options for mode of consultation	Follow-Up calls with the same doctor for consultation	**Reschedule option available with every reminder**



5 of the 6 major problems faced by users with respect to teleconsultation remain unaddressed by the present product of Plum

Primary Survey - 88 Respondents

Why do you feel patients cancel their teleconsultation appointments?



Based on the primary research, **5 of the 6 major obstacles** faced by the end consumer remains **unaddressed** by the **present product** of the brand.

What does the ideal customer value in teleconsultation?

01 Timely Consultation

The patients are primarily **Gen Z and millenials**, and due to their **fast moving lives** prefer **instant consulation without delay**

02 Certain Degree of Trust

They prefer **consultation from** an **experienced doctor** in order to develop certain degree of trust.

03 Ease of Use / Convenience

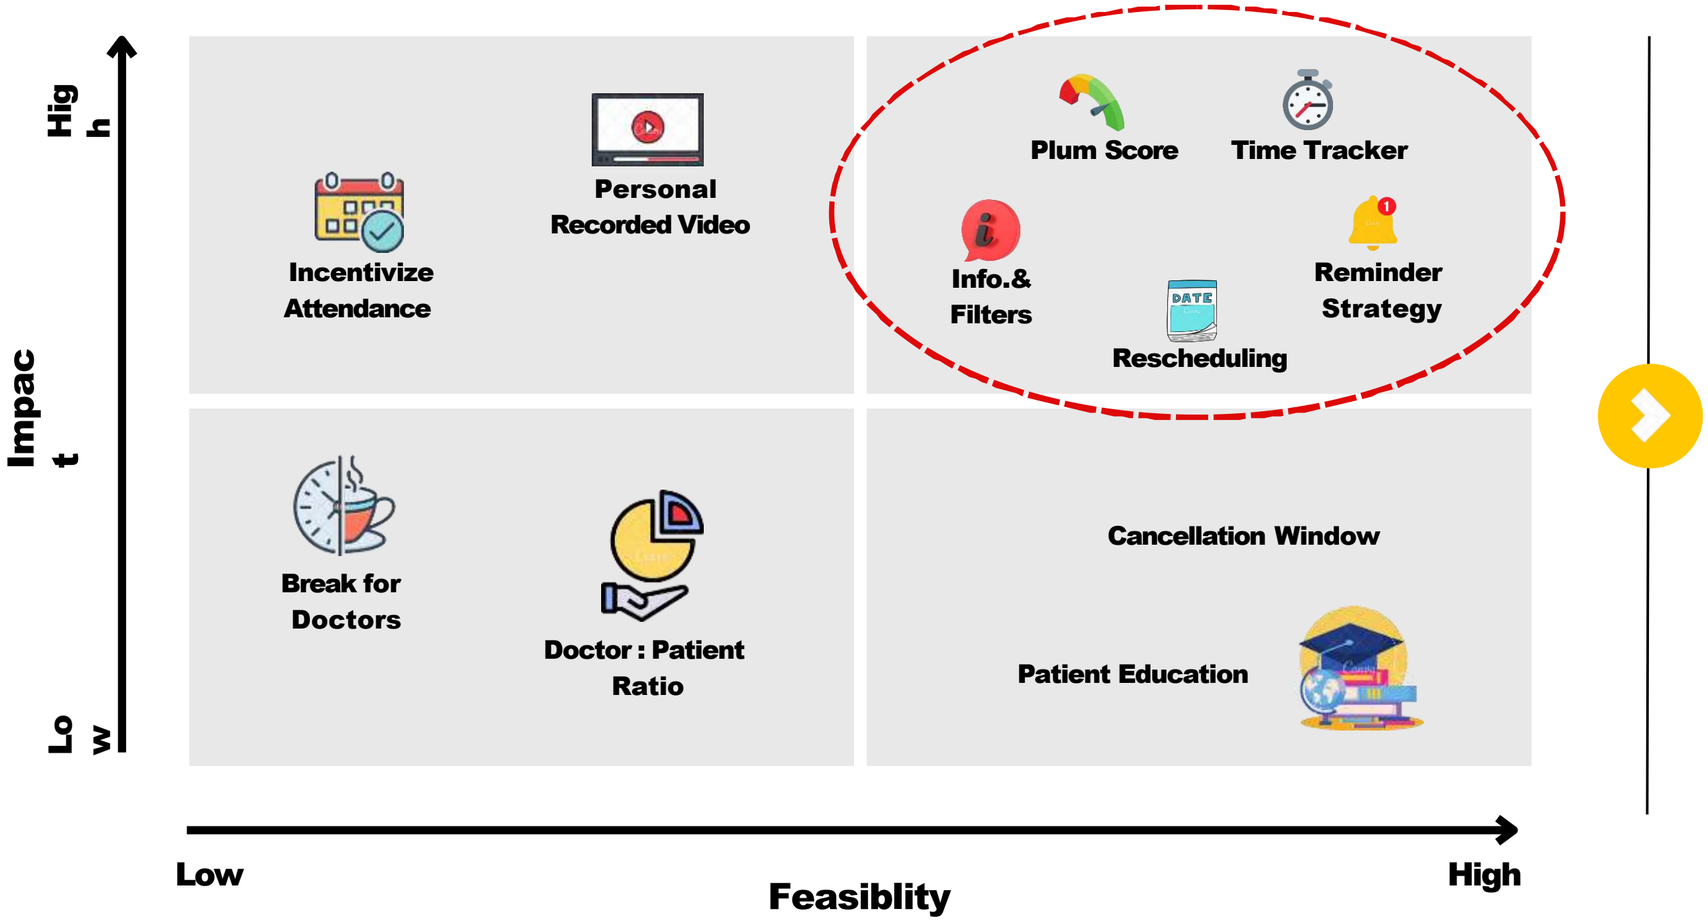
All the **important features** should be **easily accessible** to the user in order to entice them to use it

04 Regular Reminders

The user **expects** the **app** to **regularly remind** them of the **appointment** so that they do not miss it.

The brand faces key challenge in instilling user discpline given the services are free along with the problems in user journey which are catered by our proposed solutions

Which solution initiatives to pursue?



The E-CARE Solution

Easy Rescheduling
Making **rescheduling** the **go-to-option** for all **no-shows** by **strategic placement** in **notifications** and **reminders**.

Continuous Time Tracker
Real-time tracker and **call duration estimator** along with **regular updates from doctor**.

Aggregate Plum Score
Introducing **plum score** based on **user's consultation track record** and providing **exclusive access** to features

Reminder Strategy
Integration with **Google Calendar**, **Automated Call** along with **"Remind Your Loved One"** option.

Effective Filters and Information
Introducing **rating mechanism** and **displaying patients consulted** with doctor's profile and introducing **additional filters**.

Plum Score: Increased Responsible Usage

Introducing Plum Score, a performance tracker incentivizing responsible usage while restricting access to exclusive features based on the score

The Plum Score

The **absence** of **monetary transaction** between the **end user** and the **company** makes it **difficult to inculcate** the **discipline** on the users end.

Making Users More Responsible

Plum Score

A **score** for **each user** based on **4 parameters**

- **No-shows**
- **Delays in joining the call**
- **Cancellations**
- **Rating given by the doctor**

Exclusivity

Based on the **score** users are provided **exclusive access** to **more** number of **consultations**, more **follow - up messages** etc., **incentivizing** them to **act** more **responsibly**

For Consumers

Pain-points solved

- Lack of incentives to avoid no-shows and casual cancellations

Value created

- **Exclusive access to feature for proper conduct**

For Company

Pain-points solved

- Casual bookings and cancellations due to lack of penalization

Value created

- **User discipline and reduced cancellation and no-show rates**

Time Tracker: Better Wait-Time Estimation

Keeping the users in loop by providing real-time update about any and every delay to reduce apprehensions and subsequent cancellations

Time Tracker

86% patients say that if they were **told in advance about a long wait time** that they would feel **less frustrated**.

24% users cancel on **commitments** over **uncertainty** as it happens to be one of the six core human needs

Increasing Transparency with respect to Time

Average Call Duration

Based on **doctor's past consultations**, the AI provides the user with **average call duration** statistics in order to **reduce uncertainty** of **time commitment**

Real-Time Update

Patients receive **real-time update** as to **how long** the **previous consultation** has been **going on** and based on **average duration, what to expect**

Update about Delay

Doctors receive a **pop-up** to **mandatorily update patients** about whether they will be **on time or** if there is any **delay**.

For Consumers

Pain-points solved

- Uncertainty due to uniformed delays in appointments

Value created

- **Users are updated in real time and informed of any delay**

For Company

Pain-points solved

- Cancellation due to ambiguity because of delays

Value created

- **Reduced cancellation rate due to more transparency**

North Star Metric

Cancellation Rate after Joining the Chat

Target: Declining rate of cancellation

Frictionless User Experience

Information and Filters: Increased Customer Trust

Increasing transparency by providing in-depth information about the doctor's experience along with key social validation factors while introducing effective filters

Building Trust

Patients **doubt** the **credibility** of **doctors** in teleconsultation and was the **third major reason** of **cancellation** in our primary survey

Building Trust through Information and Filters

Information

Increasing transparency by mentioning crucial information

- **Number of patients consulted** in **employees organization** to develop **personal connection**
- **Ratings** based on past **consultation track record**
- **Years of Experience**

Filters

Patients can **filter out doctors** based on **proximity** to their residence for any offline follow-up, **# of patients consulted** in **their organization**, and **ratings**

For Consumers

Pain-points solved

- Lack of trust and credibility

Value created

- **Transparency builds a foundation of trust**

For Company

Pain-points solved

- Cancellation due to lack of trust and apprehensions

Value created

- **Reduction in cancellations and better user experience**

North Star Metric

% of Users Using the New Range of Filters

Target: Increase in filter adoption rate

Frictionless User
Experience

Reminder Strategy: Reminders That Actually Remind

Personalizing the reminder experience to enhance user response through Google Calendar integration, 'Remind Your Loved One' and Automated Call features.

Personalized Reminders

Patients tend to **miss** the **SMS** and **WhatsApp reminders** due to **extreme busyness** or simply **overlooking it** with other messages

Tackling problem on 3 fronts

Google Calendar

Appointment is **automatically added** to the patient's **Google calendar** and **full-screen reminder** makes it **impossible** to **ignore**.

Remind Your Loved One

"Remind your loved one" feature where a **loved** is **sent a reminder** and can then **call** and **remind** greatly lowers the chance of missing the appointment

Automated Call

Automated call reminders make it **more difficult** to **miss** in comparison to a text message reminder.

For Consumers

Pain-points solved

- Forgot about appointments due to fast-paced life

Value created

- Effective reminders making it impossible to miss appointment

For Company

Pain-points solved

- No-shows due to appointment slipping of the user's mind

Value created

- Reduced no-show rates due to more effective reminders

North Star Metric

Opt-out Rate

Target: Decline in Opt-out rate

Audience Segment

Easy Rescheduling

Frictionless User
Experience

Easy Rescheduling: Frictionless User Experience

Easy rescheduling alternatives so that the busy bee audience segment can reschedule on the go without encountering the friction of alternating between apps.

Making Rescheduling Easy

Did You Know?

66% adults believe that the **most important thing** a company can do is **value their time** during a service interaction.

Sudden **change in work-schedule** and **emergency** makes it **difficult** for patient to **reschedule** their appointment due to **friction in opening app**

Tackling problem on 3 fronts

- **Configurable notifications:** The patient receives a **notification** that will include an **option to reschedule** the appointment **reducing friction** to open the app
- **Rescheduling on call:** User receives an **automated reminder call** where he can **reschedule** the appointment by **pressing 1** and **selecting free slot** by **relevant keys**
- **Reminder messages:** Reminders on **SMS** and **WhatsApp** include an **option to reschedule automatically** opening the **rescehudle screen**

For Consumers

Pain-points solved

- Change in work schedule makes rescheduling difficult

Value created

- **Easy and organized rescheduling process**

For Company

Pain-points solved

- No-shows due to emergency and work-schedule changes

Value created

- **Reduced no-show rates**
